<ul style="list-style-type: none">Developed real-time client web applications using React.js and full-stack techniques.Utilized MongoDB for efficient NoSQL database management and worked with Express.js for server-side development.	

PROJECTS

Blog Application MongoDB, Express.js, Bootstrap, HTML, EJS, CSS, JavaScript
<ul style="list-style-type: none">Developed a blog application with admin panel, login, and data deletion features using MongoDB for storage.Implemented MVC architecture with Express.js for server-side logic, ensuring scalability and maintainability, and utilized for dynamic UI.Link - byte-tech-trend-blog.vercel.app/

Android Chat Application | Java, Android Studio, Firebase, XML

- Developed a feature-rich Android chat application for real-time messaging and user authentication, along with payment functionality.
- Enhanced user experience by incorporating a library feature containing a store of books and included a small in-app game for added interactivity and enjoyment.

Feedback System | Python, HTML, CSS, Flask

- Developed a user-friendly feedback system using Python and Flask.
- Designed an intuitive interface with HTML and CSS for enhanced user experience.

Employee Management System | Spring Boot, Java, CRUD, MySQL

- Implemented an efficient Employee Management System using Spring Boot and Java.
- Integrated CRUD operations and MySQL database for seamless data management and manipulation.

Facial Recognition Attendance System | OpenCV, Python, Excel

- Implemented a facial recognition attendance monitoring system using OpenCV and Python, enabling efficient tracking of attendance.
- Integrated Excel sheets to update data captured from cameras, providing seamless record-keeping and management.

Portfolio Website | React.js

- Developed a personalized portfolio website using React.js.
- Enhanced user experience with smooth scroll libraries and interactive elements.
